dTeam AMS: Your Learning Academy in a box!

dTeam Academy Management System is the result of the e-learning platform's technologic evolution combined with dTeam educational and methodological tools.

AMS includes the most sophisticated instruments for training paths management, questionnaires, collaborative tools and competences mapping. Specific organization and logistical services for business training support these tools.

AMS is a complete service for professional development programmes, from training needs analysis to the measurement of its efficiency and effectiveness.

Competency Centre

A set of instruments for integrated assessment

- ❖ Mapping of staff competencies at every organizational level
- ❖ Individual competencies and potential pre-assessment
- ❖ Planning of training units: courses, paths and catalogues
- ❖ Competencies gap analysis, implying a growth path matching role characteristics

Training Organization

A complete system run by outsourced management

- ❖ A personal communications service with dedicated email and phone number
- ❖ Full management of users' database, educational paths and usage statistics
- ❖ Integration with most known HR softwares
- ❖ Organization of training calendars for classrooms and online teaching

Permanent Tutorship

dTeam experience to support training development

- ❖ Consultancy to course planning and training ROI
- ❖ Technical and methodological support on the AMS platform and didactic objects
- ❖ Educational counselling and training in tutorship and mentorship
- ❖ Test analysis assistance and usage statistics assessment
